

**Armbruster Bros. Farms, Muscoda, Wis installs
Dbl. 10 HERITAGE ProTime I HerringBone**

The Armbrusters have been breeding Brown Swiss for many decades. Ed and Phyllis started it, but the next generation, five of them with Steven as the spiritual leader, established the 'The Armbruster Brand' - one of the best, if not the best Brown Swiss herds ever. All along they milked them in the old stanchion barn, up to 250 with family labor. Back breaking work for 12 hrs a day, before and after the real work of running a dairy. Life improved in July 2010, when the herd moved into the new free stalls and parlor. Milking hours are down to 8 hrs a day and if need be one of them can do the work by himself.

*Sparkling new dairy up on the hill,
just a couple of miles NW of Muscoda on HW 60*

*Dbl. 10 All-Stainless, All-Air operated ProTime I with Model SB
Arm TakeOffs; solid equipment milking a great herd of cows*

*First milking in the new parlor—
cool, calm and collected. With Eric in charge of the holding pen, its almost like a walk in the park - no hollering, no frustrations, no sweat, no swearing and good milk flow.*

Lime on the floor helped, so did the wide-open Brisket Bar, where they can see where they are going.

All-Stainless, All-Air Crowd Gate
All-stainless indeed. Absolutely, positively twice as effective as all others. After all, the cows know a good thing when they see it: "Wow, look at that!" and really get into the swing of things, "Lets move on up there, friends!" Left alone in the holding pen, they come into the parlor by themselves, almost always on the same side, in the same stall and at the same time, perfectly consistent for every milking. Without the 'Rodeo in the Holding Pen', (and no electricity on the gate!) there's no Adrenaline and all of the Oxytocin gets to the udder for a great let down like *right now!* At the end of milking, the gate scrapes the holding pen on the last trip back. Another chore automated and no more skid loaders running into gates and fences.

All-stainless HERITAGE Parlors

People Comfort - Cow Comfort - Great Quality of Milking!
